

Tutorial Session Plan Form

Please complete the following form to outline your plan for the upcoming tutorial session.

1. Module Information:

- Module Code: DES15W0
- Module Name: Development Software 1

2. Session Details:

- Date: 29 July 2026
- Time: 17:00
- Venue: Microsoft Teams

3. Session Objectives:

- Clearly outline the specific learning objectives for the session.
 - Understand and apply the components and pseudocode rules of Simple and Compound IF Statement.
 - Write Simple and Compound IF Statements based on program scenario.

4. Session Outline:

- Provide a detailed breakdown of the topics or activities you plan to cover during the session.
 - Topic: Simple and Compound IF Statements.
 - Activity: Implementation of IF Statements based on a program scenario.

Interactive Activities:

- Describe any group discussions, exercises, or interactive methods you plan to use.
 - Do Compound IF Statements from a scenario's program requirements.

5. Materials/Resources:

- List any materials, resources, or handouts needed for the session.
 - Materials: Microsoft Word, Chrome, and Notepad.

6. Feedback Mechanism:

- Outline how you will gather feedback from students during or after the session.
 - During the session: Get feedback on every activity and understanding of the students in their solutions and methods on the program requirements.
 - After the session: Gather interactive feedback from students that worked on the program requirements.
